I'm a web designer & Front-end developer experienced developer with a strong foundation in web application development. Proficient in a range of programming languages, with a focus on creating efficient and user-friendly solutions. Adept at collaborating with cross-functional teams to translate complex requirements into innovative technical solutions. Demonstrated ability to design, code, and test front-end components. Committed to continuous learning and leveraging

EDUCATION

Lagos State University

Bachelor of Science in Botany/Plant biology

Aug. 2018 – May 2021

WORK EXPERIENCE

8th Gear Hub and innkeeper Hackerspace

April - June 2024

- Implemented and maintained frontend features using React.js, ensuring a consistent and polished user interface
- Conducted code reviews and collaborated with senior developers to optimize code for performance and maintainability
- Collaborate with cross-functional teams to define, design, and ship new features, maintaining a cohesive and user-friendly experience.

ALT SCHOOL AFRICA

Sept 2023 – June 2024

- Conduct regular code reviews to ensure code quality, adherence to coding standards, and knowledge sharing within the development team.
- Design and deliver comprehensive programming courses covering fundamental and advanced concepts in web development.
- Lead the development of frontend web applications from concept to deployment, ensuring high performance and responsiveness. Implement and maintain interactive design to support frontend functionality.

PROJECT

Netflix clone

- Built a Netflix clone using React.js, Material Ui, Css, utilizing Firebase for user authentication, database management, cloud storage, and Cloud Functions displaying the movie data from TMDB API

Weather app

- Built a weather app to check for weather and temperature of a city

E-commerce website

- Built an E-commerce website with my team

Responsive Landing Page

- Built a landing page using bootstrap
-
